GARRETT DIRECT FIT REPLACEMENT TURBOCHARGERS

Nissan GT-R R32 | R33 | R34 RB26DETT Engine

Garrett replacement turbochargers for the Nissan GT-R R32 | R33 | R34 platforms offer enthusiasts a direct fit option for the RB26DETT engine platform. An internally wastegated turbine housing with a 0.64 A/R is calibrated to 11.7 PSI / 80.9 kPa to maintain the OEM driveability. The compressor housing inlet and outlet feature bolted flanges providing interchangeability with the OE hardware to ensure a perfect fit every time.

Contact your local authorized Garrett distributor for additional information and pricing.

Turbo	Model	GT2560R
	PN	880934-5001S
	Comp Inducer	45mm
	Wastegate Pressure	11.7 PSI / 80.9 kPa
Vehicle	Model	Nissan GT-R R32 R33 R34
	Type	RB26DETT
Engine	Fuel	Gas
	Cylinders	6

**Performance results of this product are highly dependent upon your vehicle's modifications and tuning/calibration. The target power represented above has been calculated based strictly on choke flow of the compressor map (total turbo capability), which represents the potential flywheel power.*
