New accessories

New heat shield to **GT25** y **GT28** turbine housings used on Performance applications.

The heat shield kit part number **785928-0001** consist in following parts:

- Heat Shield
- Bracket
- 2 screws

The heat shield can be adjust by the braket to one of the bolts of the turbine housing. Also if the bracket don't match your requirements, it is possible you manufacture one that can be screw to the heat shield.
